

CONSERVATION COLONIAL TRAIL & MEADOW

Historic Camden is seeking funding to expand our
Nature Trail & Colonial Meadow.

Our woodland nature trail is being transformed into a replica of an 18th-century wilderness road, expanded slightly to allow our horse drawn wagons access for tours.

We are also actively conserving a low-maintenance natural meadow habitat, near the Kershaw house which will be seeded with native perennial wildflowers providing an essential habitat for bees, butterflies, and birds. The Colonial Meadow will increase biodiversity and requires no fertilizer or pesticides and will only need mowing once a year
