Capital Campaign

WATEREE ROAD FORGE BLACKSMITH SHOP

Historic Camden is seeking funding for the construction to enclose our new timber framed Colonial Blacksmith Shop.

Our Woodworking Guild has completed the timber framing of the building and the two forges have been built. The structure will now need to be enclosed and the interior completed.

Historic Camden's new Colonial Blacksmith Shop will have two working forges and the only working water-powered trip hammers in the United States, *(according to Colonial Williamsburg).*

WATEREE ROAD FORGE GUNSMITH SHOP

Historic Camden is seeking funding for completion of the interior of our Colonial Gunsmith Shop

The north end of the Waterree Road Forge building will be the home of Historic Camden's new Gunsmith Shop. The wooden floor and the interior fixtures of the Gunsmith shop will need to be built out. Tools, equipment, and historic exhibit display items will also need to be purchased,

Programing will be provided by Robert Hill, a fifth-generation flintlock gunsmith.
